

AK-V AK-VI 2024model

1. Introduction:

AK-V is a professional velvet cutting compatible velvet gun,
AK-VI is a professional velvet gun,
patented products, nine upgrades.

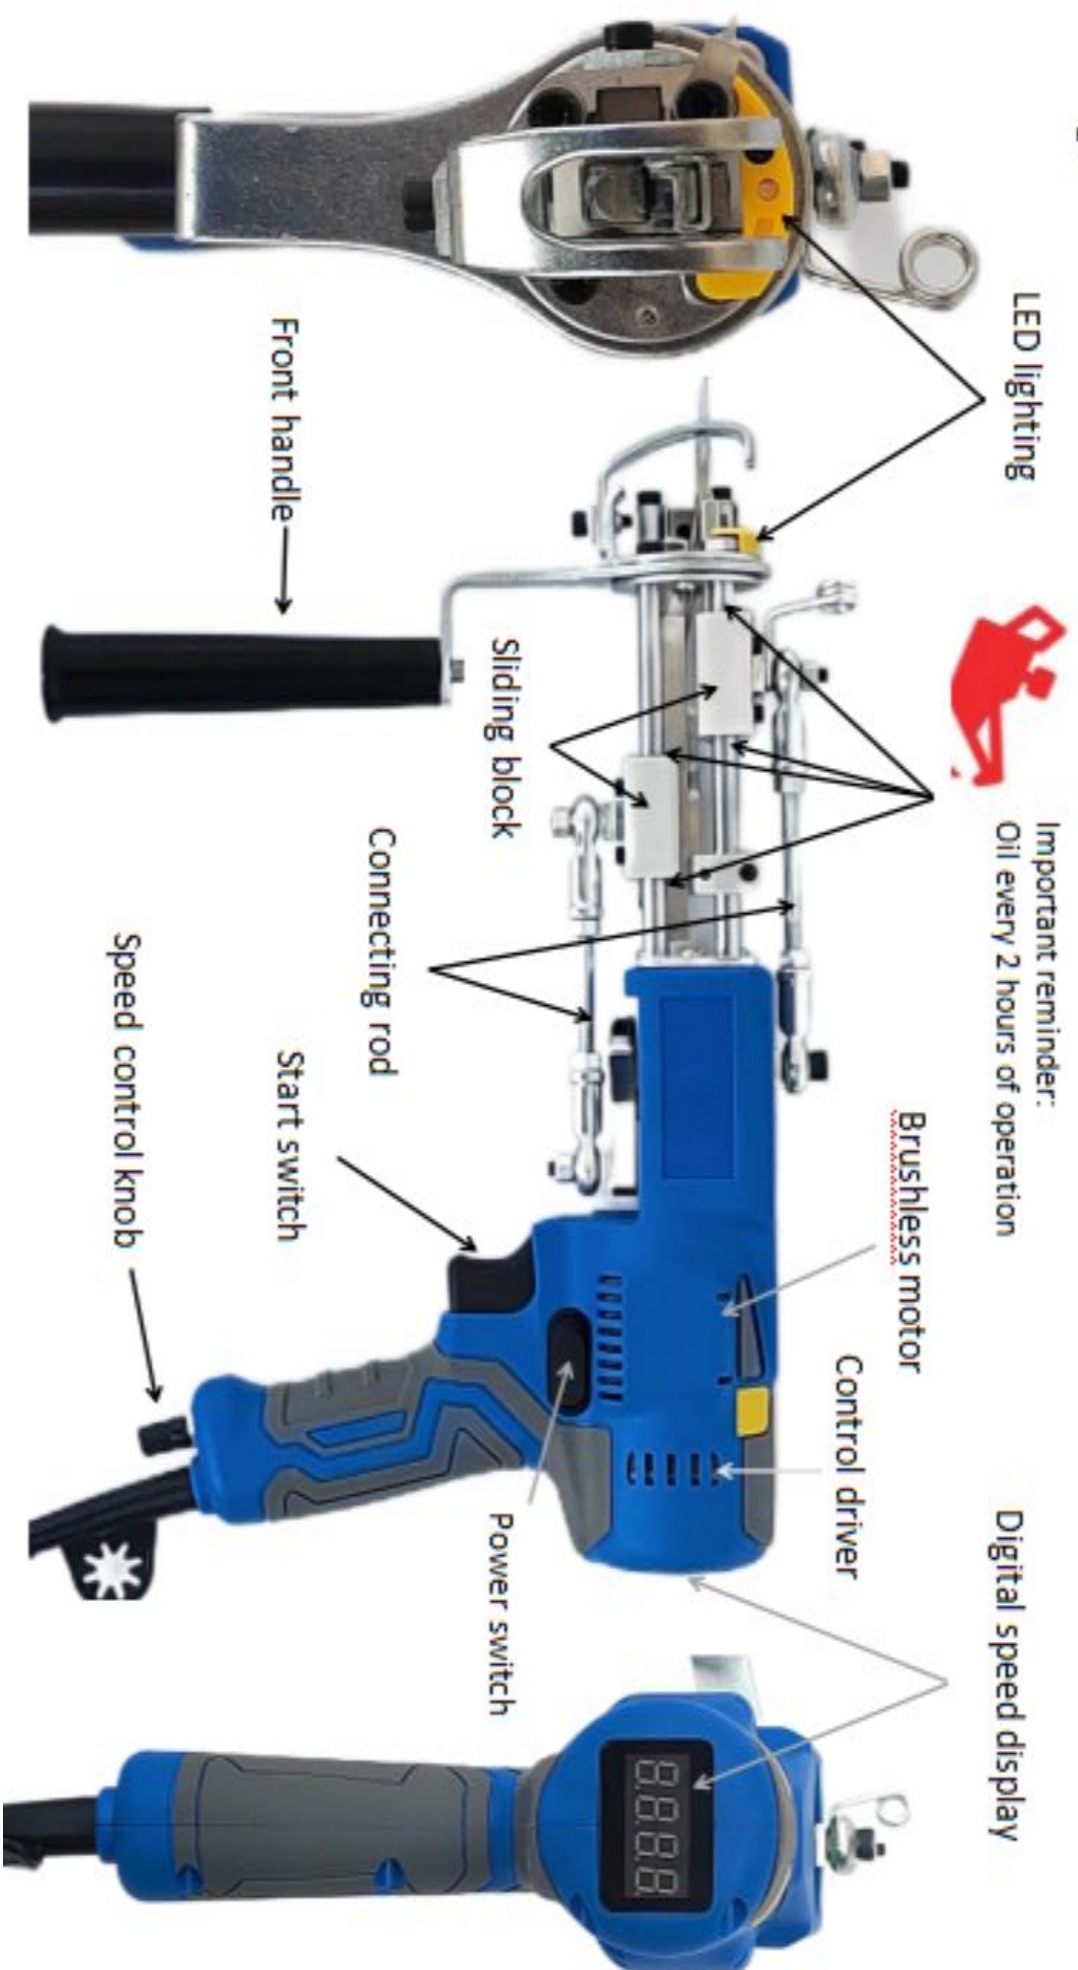

1. The new velvet gun has a beautiful appearance design. Two-color double material. Handle coated glue. Hand comfort can reduce fatigue during long-of use.
- 2, the new flocking gun uses DC brushless motor, brushless motor small volume, light weight, large power, small noise, no spark, life Life is long and so on.
- 3, the new tuft gun original mechanical contact brake device upgrade the hidden no contact hall magnetic brake device makes the brake system more stable life and infinite extension.
- 4, the new flocking gun has increased the speed display, adjust the speed more intuitive.
- 5, the new tufted gun uses synchronous belt transmission, small noise, long life, smooth transmission.
- 6, the new tuft gun eccentric wheel increase weight device to make it more stable vibration significantly reduced.
7. The new tuft gun adds a lighting device at the front end to make the working area clear and bright.
8. The new flocking gun is upgraded from the traditional scissors collision closing device to the scissors back closing device, which perfectly solves the vibration and noise caused by the collision closing of the original scissors, and perfectly solves the problems of the collision closing of the original scissors, which makes the blanket surface irregular and difficult to adjust.
(Note: This shipment is configured according to customer requirements)
- 9, the new tufted gun with short handle scissors easy to dismantle, imported white steel material automatic grinding blade sharp.
(New and old models are optional)

2、 parameter

model	supply voltage	power W
AK	100V-240V	120
speed	packing measurement	Net weight /gross weight
1000-6000	36.5*29*8.8cm	1.35Kg/2.5Kg

3、 Important tips maintenance diagram

Drop the lubricating oil every 2 hours according to the figure Make sure the movement is smooth smooth; unhindered

4、 Happy art of handmade tufting begins here

As shown in the figure Turn on the power supply for trial operation

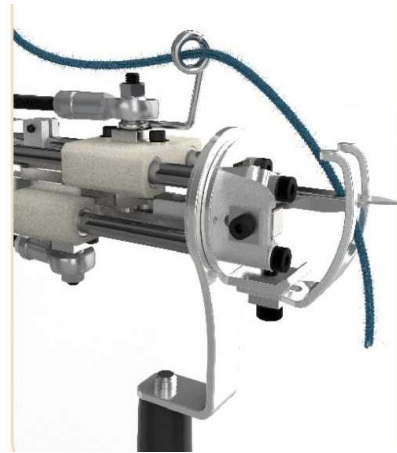

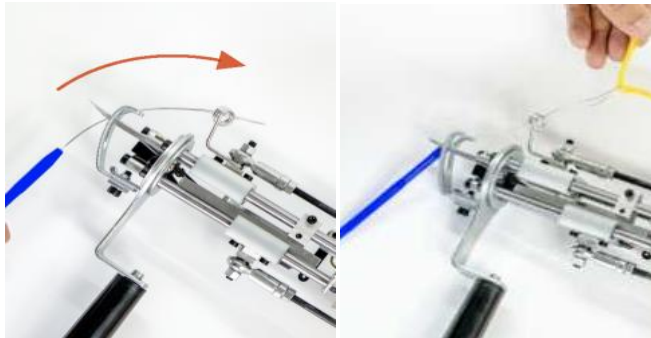

5、 Hang the flocking gun from the base cloth See the picture

- 6、 Before piercing the yarn, turn off the power switch of the machine or unplug the power plug to avoid accidental harm to the user. When the machine is running, do not touch the moving parts on the machine.

Tufted thread can be operated according to the diagram

Hand with the gun as shown

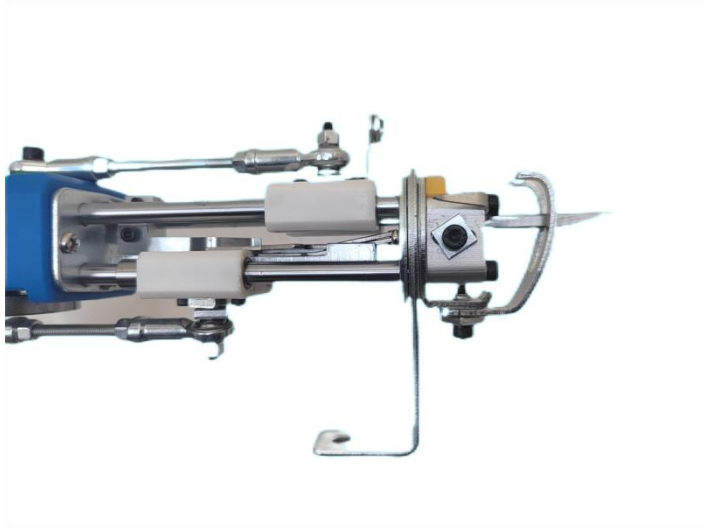

It's important to maintain the proper direction when operating the tufting gun. Incorrect direction will result in failed tufting. Note the direction the foot is facing, Significant pressure must be applied to the backing in order for the tufts to be pushed to the front side of the rug.

7、 Let's start the carnival!

Here is a step-by-step guide to the finished rugs. This assumes that you are ready and are ready.

1. Design your carpet.
2. Select the yarn color in the corresponding area.
3. Tie your Kibra up on the frame.
4. Make your pattern on the liner. We use a marker pen or a projector. After completing your design tufted on your base cloth, your design drawings will not be fully displayed.

5. Mark the design area with the appropriate yarn color. Avoid color confusion.
